## ERRATA.

Page 57, sixth line. For "firmness" read "fineness."

Page 91, thirty-fifth line. After "surface," add "a layer of brick laid flat and dipped in asphalt, with proper precautions, or"

Page 94, thirty-seventh line. "Cold liquid asphalt paint" is a relative term used to distinguish paint heated only enough to make it liquid from the rock asphalt raised to a temperature of 300° and used as the outside coat.

Page 128, sixteenth line. For "paris green" read "plaster of paris."
